

1 Create shortcuts to your favorite apps & websites

Launcher works with the apps you already use. With support for any Windows program, Microsoft Store app or Web URL. Users can find and launch the apps they need with one touch. No need to go searching for the right application or website.

2 Connect your room calendar to launch calls with ease

Launcher integrates with Microsoft Exchange and Google Calendar, supporting Zoom, Microsoft Teams, WebEx, Google Meet, GoToMeeting, Lifesize, and more. Start or join your video call with ease.

3 Personalize the display with your logo & background

Keep your brand identity front and center by customizing the meeting room screen with a background and logo of your choice.

4 PIN-protected settings

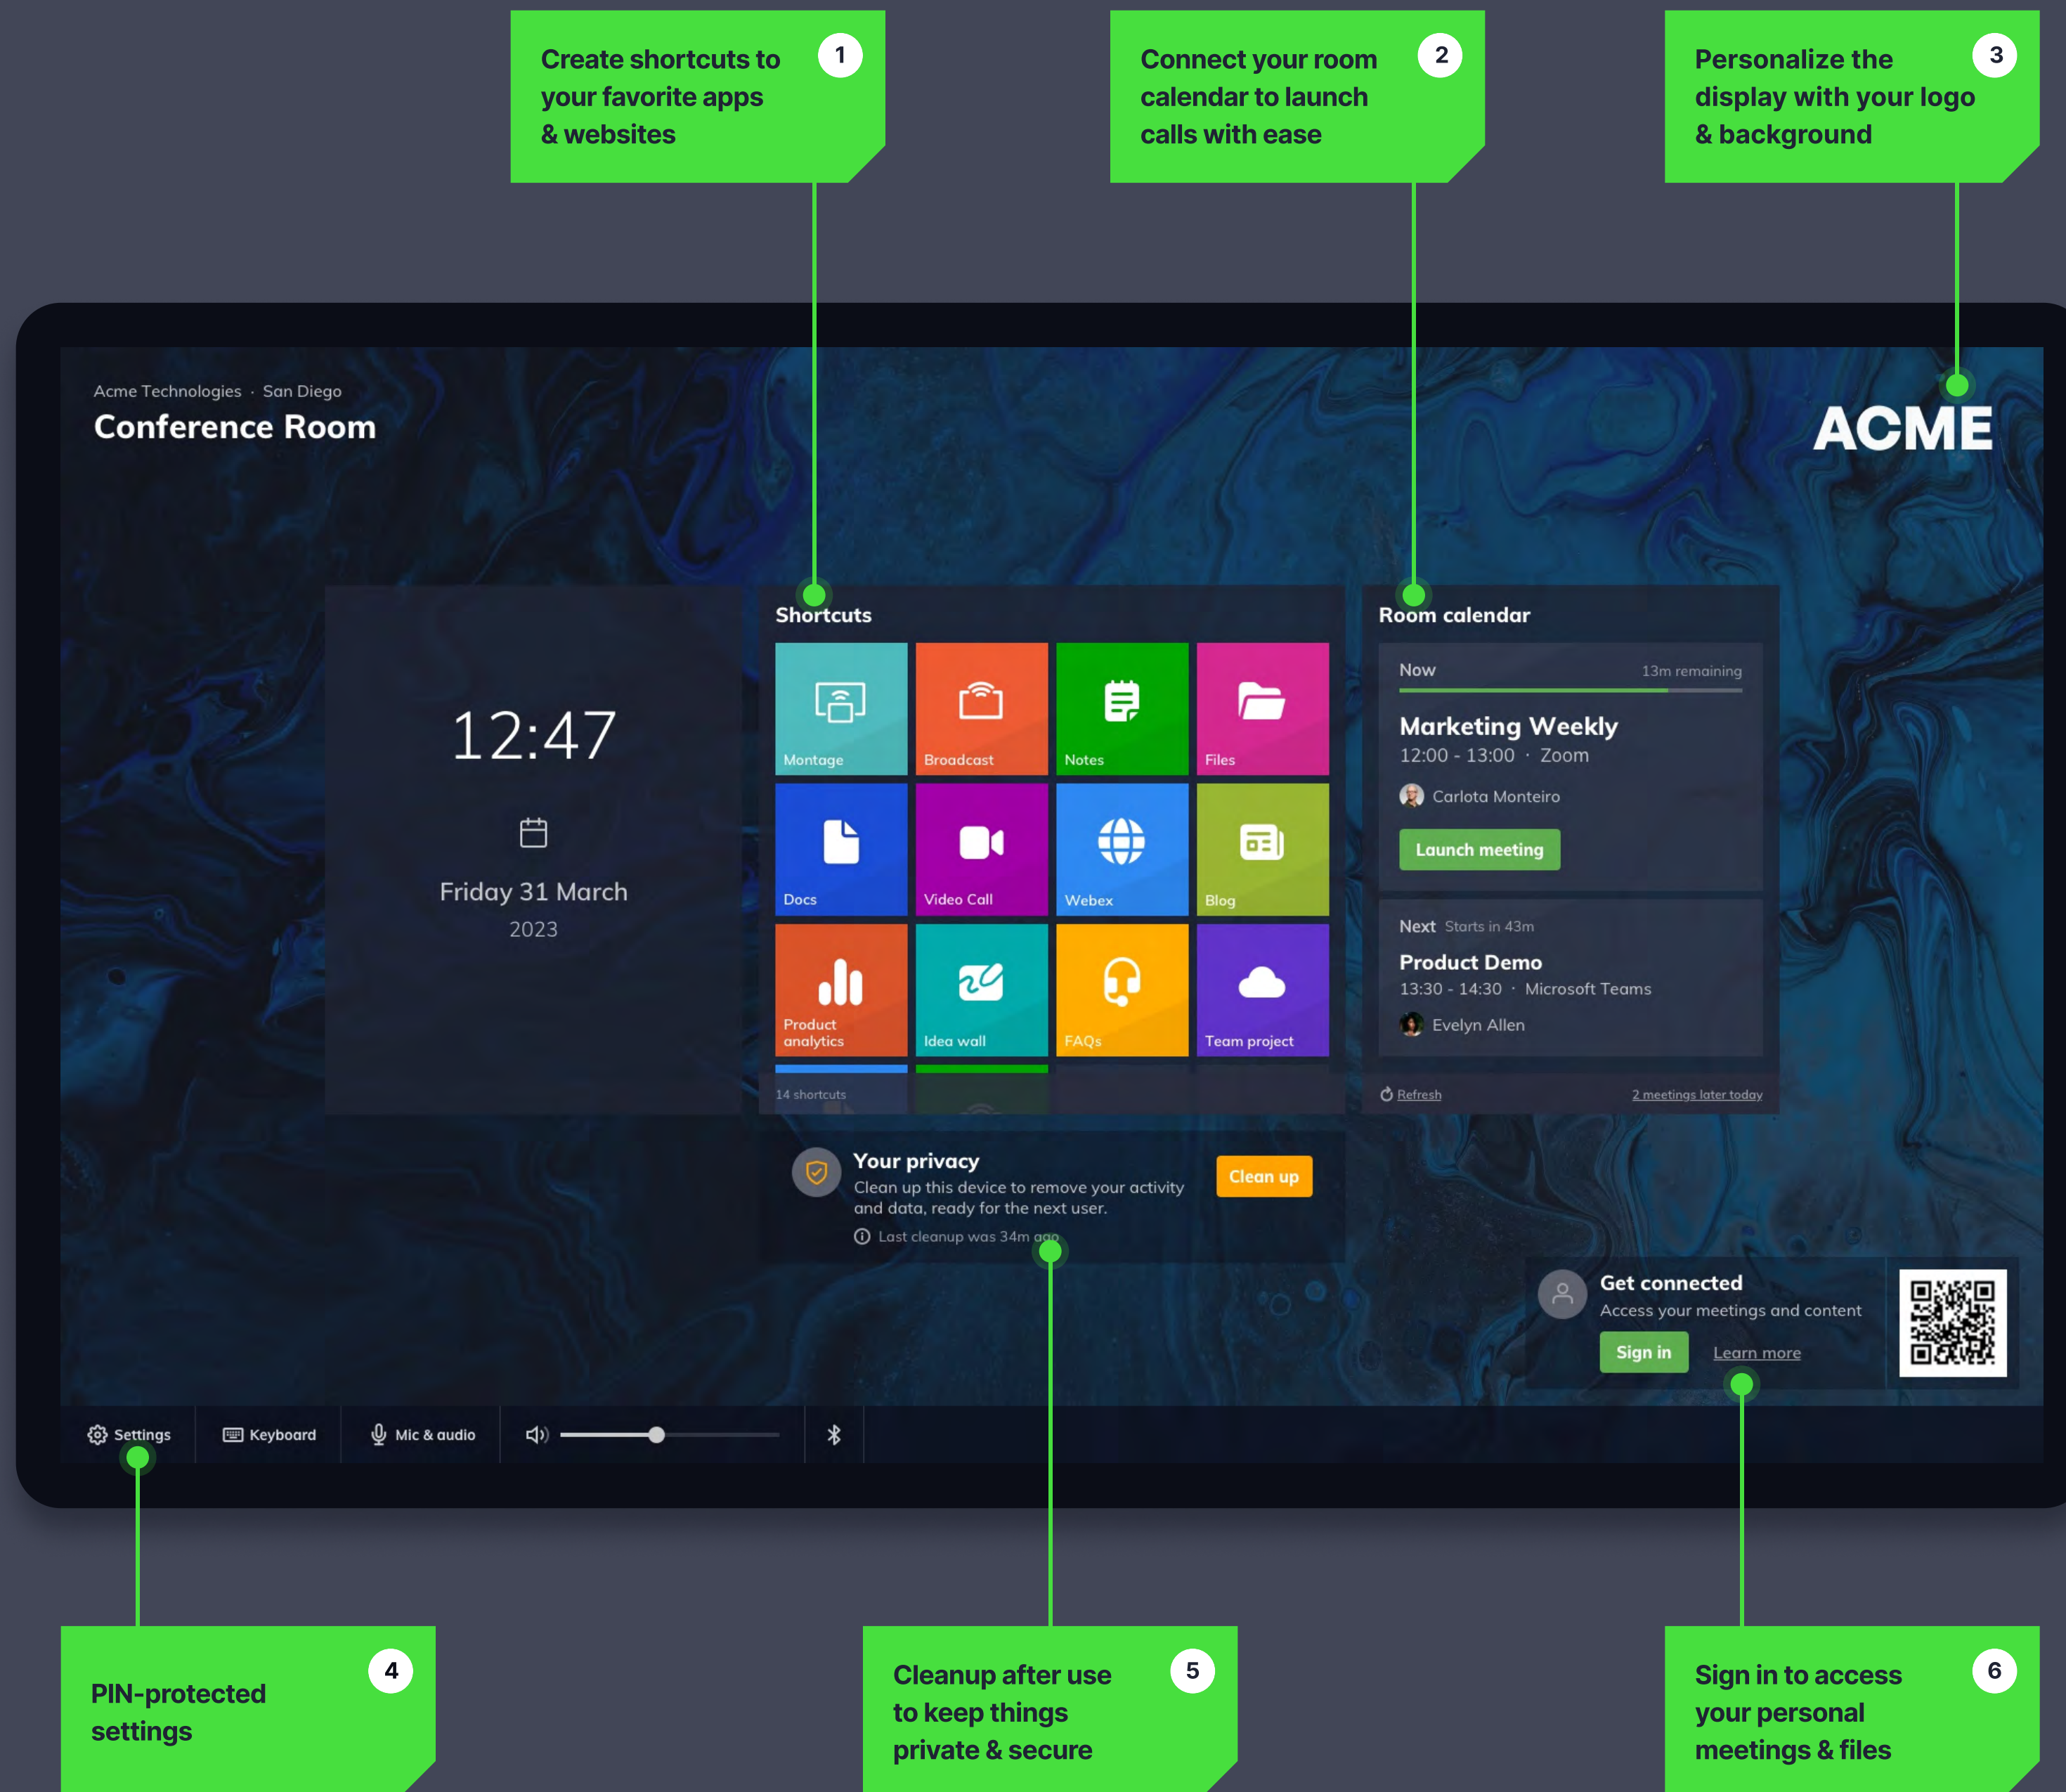

Lock things down with Kiosk Mode to prevent unwanted access to the Windows system; export/import your configuration for easier rollout across your meeting rooms; customize app tiles, and much more.

5 Cleanup after use to keep things private & secure

Keep your data private with the Automatic Cleanup Function. Choose when and how often the room is cleared, or manually clear all digital footprints after each session with a simple touch.

6 Sign in to access your personal meetings & files

Turn the screen into a personal device with access to OneDrive files and meeting calendar. Sign in from the screen or Launcher mobile app. That means users can access video calls, calendars, and content on any screen and in any room.
