OUR COMMITMENT TO YOUR SECURITY AND PRIVACY

DisplayNote

At DisplayNote, we prioritize protecting our partners and end users. Why? Because in a world of evolving digital threats, safeguarding sensitive information and maintaining trust is essential.

To ensure your security across all aspects of our service, we focus on three critical areas:

- ✓ **Service-Level Security**
- ✓ **Development Security**
- ✓ **Communications + Data Security**

01 SERVICE-LEVEL SECURITY

Our frontline of defense is fortified with endpoint protection, managed 24/7 by vigilant experts. This, paired with SecurityScorecard's non-intrusive monitoring, grants us a stellar rating, exemplifying our security-first philosophy. Additionally, our services are continually observed by a system that checks service functionality and generates alerts around the clock, ensuring immediate response to any incidents.

02 DEVELOPMENT SECURITY

In our development cycle, we embed security from the ground up. We partner with industry-leading training and development providers as identified by Gartner's Magic Quadrant and IDC marketplace, to train our employees on the latest technologies and security measures. This ensures that our employees are well-equipped to identify and address potential threats.

03 COMMS + DATA SECURITY

We preemptively block threats to secure our communication flows, which are essential to our operations. All video and audio transmissions are safeguarded with end-to-end encryption, employing DTLS and SRTP with the TLS_ECDHE_ECDSA_WITH_AES_128_GCM_SHA256 cipher suite. Additionally, hosting our servers in Microsoft's European data centers, compliant with SOC 2 Type 2 standards, showcases our commitment to data protection and compliance.

Our multi-faceted security strategy emphasizes advanced defenses, secure development, and robust encryption. This ensures that our products are not just compliant, but are at the forefront of cybersecurity.

This commitment, combined with our dedication to continuous improvement, offers our partners and end users unmatched trust and reliability, steering them safely through an ever-changing digital landscape.
